PROFESSIONAL SUMMARY

Frontend Developer specialising in React, Next.js, and Angular, with deployed projects in biometric authentication and secure web platforms. Passionate about pixel-perfect UI, scalable web experiences, and building impactful solutions for real users.

EDUCATION

Jomo Kenyatta University of Agriculture and Technology

Expected June 2026

Diploma in Information Technology — Nairobi, Kenya

TECHNICAL SKILLS

Languages & Markup: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React, Angular v21, Next.js, Tailwind CSS

Tools & Technologies: Git, GitHub, VS Code, Chrome DevTools, REST APIs, JWT, Figma

Concepts: Responsive Web Design, Version Control, UI/UX Fundamentals, Agile Development, Biometric Authentication

PROJECTS

Secure Biometric Online Voting System

2025

React, Node.js, Express, MongoDB, Face Recognition API, JWT | [Live Demo](#) | [GitHub](#)

- Built a secure web-based voting platform for JKUAT integrating biometric face recognition to ensure only verified students can vote.
- Implemented JWT token-based authentication to prevent duplicate voting and secure vote submission.
- Developed an admin dashboard for real-time election monitoring and integrated RESTful APIs for login, voting, and results.
- Deployed live on Netlify; collaborated with a backend engineer using Git branching workflows.

Her-Him Bank Dashboard

In Progress

Angular v21, TypeScript, CSS | [GitHub](#)

- Building a responsive banking dashboard with Angular v21, featuring account overview, transaction history, and send money flows.
- Focused on component architecture, TypeScript typing, and clean UI design across multiple dashboard views.

Number Guessing Game

2025

HTML, CSS, JavaScript | [Live Demo](#)

- Built an interactive browser-based number guessing game featuring real-time feedback, score tracking, and responsive design.
- Demonstrates core JavaScript logic, DOM manipulation, and clean UI design without any frameworks.

EXPERIENCE

IT Support Intern — Trademark/Tribe Hotel, Nairobi

May 2025 – August 2025

- Provided IT support across hotel departments, troubleshooting hardware and software issues to minimize operational downtime.
- Gained hands-on professional experience in a fast-paced environment, supporting day-to-day technical operations.

Personal Web Projects — Independent

2023 –

Present

- Built and deployed multiple personal projects using HTML, CSS, JavaScript, and React with a focus on responsive design and clean UI.
- Managed version control using Git and GitHub across all projects.

ADDITIONAL INFORMATION

Interests: Software testing and open-source collaboration.

Soft Skills: Team Collaboration, Communication, Problem-Solving, Time Management, Adaptability.
