

Marion Tamnai Kiterie

Nairobi, Kenya | mariontamnai@gmail.com | +254 114 888 718 | github.com/mariontamnai | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Developer transitioning into QA Engineering, with hands-on experience in manual testing, API testing, and bug reporting. Built and tested production-ready projects including a biometric voting system with JWT authentication. Passionate about software quality, finding edge cases, and building impactful solutions for real users.

EDUCATION

Jomo Kenyatta University of Agriculture and Technology | Expected June 2026

Diploma in Information Technology — Nairobi, Kenya

TECHNICAL SKILLS

Languages & Markup: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React, Angular v21, Next.js, Tailwind CSS

Tools & Technologies: Git, GitHub, VS Code, Chrome DevTools, REST APIs, JWT, Figma, Postman

Testing & QA: Manual Testing, API Testing, Test Planning, Bug Reporting, Exploratory Testing

Currently Learning: Cypress, Playwright

Concepts: Responsive Web Design, Version Control, UI/UX Fundamentals, Agile Development, Biometric Authentication

PROJECTS

Secure Biometric Online Voting System 2026

React, Node.js, Express, MongoDB, Face Recognition API, JWT | [Live Demo](#) | [GitHub](#) | [QA Portfolio](#)

- Built a secure web-based voting platform for JKUAT integrating biometric face recognition to ensure only verified students can vote.
- Implemented JWT token-based authentication to prevent duplicate voting and secure vote submission.
- Developed an admin dashboard for real-time election monitoring and integrated RESTful APIs for login, voting, and results.
- Deployed live on Netlify; collaborated with a backend engineer using Git branching workflows.
- Wrote and executed 8 manual test cases covering login, biometric verification, vote submission, and duplicate vote prevention — all passing.
- Documented 3 bug reports with severity ratings and screenshots, including a server error on short password input (High severity) and exposed sensitive fields in the API response (Medium severity).
- Built and executed 23 automated API tests in Postman across 10 endpoints, validating authentication flows, admin operations, and error handling.

Her-Him Bank Dashboard In Progress

Angular v21, TypeScript, Supabase, CSS | [GitHub](#)

- Building a responsive banking dashboard with Angular v21, featuring account overview, transaction history, and send money flows.
- Focused on component architecture, TypeScript typing, and clean UI design across multiple dashboard views.

Number Guessing Game 2025

HTML, CSS, JavaScript | [Live Demo](#)

- Built an interactive browser-based number guessing game featuring real-time feedback, score tracking, and responsive design.
- Demonstrates core JavaScript logic, DOM manipulation, and clean UI design without any frameworks.

EXPERIENCE

IT Support Intern — Trademark/Tribe Hotel, Nairobi May 2025 – August 2025

- Provided IT support across hotel departments, troubleshooting hardware and software issues to minimize operational downtime.
- Gained hands-on professional experience in a fast-paced environment, supporting day-to-day technical operations.

Personal Web & QA Projects — Independent 2023 – Present

- Built and deployed multiple personal projects using HTML, CSS, JavaScript, and React with a focus on responsive design and clean UI.
- Maintained a QA portfolio on GitHub documenting test plans, bug reports, and automated Postman collections for personal projects.
- Managed version control using Git and GitHub across all projects.

ADDITIONAL INFORMATION

Interests: Software testing, open-source collaboration, and frontend development.

Soft Skills: Team Collaboration, Communication, Problem-Solving, Time Management, Adaptability.
